*As Featured On*

Our swim spa range provides for all. Whether you need a rigorous fitness or swim routine, or an aquatic exercise centre, we're sure we have the Swim Spa model for you.

Choose from our single chamber swim spas, or our dual temperature swim spa & hot tub combination units. The temperature of the swim spa and hot tub can be adjusted independently so that you can enjoy a massage in warm water and exercise in cooler water.

You can also control the counter current speed with our best-selling Turbine model, with up to 8 different speed settings enabling you to personalise your swim to suit your ability. This, combined with powerful levitator technology enabling your body to stay afloat when swimming, offers the ultimate swim experience.

*in partnership with*

## ABOUT US

# FEATURES

At the heart of every British Swim Spa are the key principles of energy efficiency, reliability, innovation and user experience.

That's why we can boast a long list of unique features! We have the experience, the knowledge and the customer feedback over a long history to enable us to design the ultimate swim spa.

ECOZONE™

There are 3 layers of insulation to our Eco Zone system which not only protects the parts and plumbing, but helps to reduce the noise from the vibrations of the swim spa and ultimately locks the heat in ensuring lower running costs.

PUREZONE™

Our Pure Zone Plus system is perfect for those with sensitive skin, who want the most chemical free system possible.

When the spa water filters, it combines ozone and water in a UV mixing chamber to ensure ozone comes into contact with every drop of water, attacking and destroying any bacteria, to provide the cleanest and purest water possible.

## ZENZONE™

Unwind in the Zen Zone with colour changing lighting and soothing waterfalls.

Experience adjustable blade waterfalls offering a cascade of hot water therapy that certainly add to the stunning aesthetics of the swim spa itself.

## VIBROZONE™

The Vibro Zone Plus option is our carefully and cleverly designed waterproof audio system and is housed in the cabinet of your spa delivering spectacular sound.

The 4 speaker system offers Bluetooth, AUX, USB & Radio, along with an impressive subwoofer complete with a waterproof remote control so you can create the ultimate party atmosphere.

Aristech Acrylics® is the leading provider of acrylic sheets to the swim spa and bath industry for almost 50 years. Our swim spa shells are the highest quality and strength and include Microban antimicrobial product protection which inhibits the growth of harmful bacteria that can cause odours, stains, and product degradation.

That's why our swim spa range comes with a 10 year shell guarantee.

We use USA Made Balboa Control Systems and Heaters (The world's best control system) which utilise patented piezo electronic switch technology and unique potting techniques to eliminate moisture in harsh environments, thus offering control panel quality and reliability that is second to none.

## SOLIDZONE™

The ABS fibreglass base protects the inner structure of the swim spa and provides a substantial and stable platform for the swim spa to be positioned securely.

An indestructible steel frame to support the shell and expanse of water and weight in your swim spa. The steel sub structure that we use has the highest strength to weight ratio of any building material available. The light gauge steel frame provides greater structural integrity than wood, especially needed for such a large expanse of acrylic and water. Steel offers superior corrosion protection, is strong and durable, and the obvious choice for lifetime of worry free fun.

The Aristech® acrylic is then supported by the strength of strategically placed steel reinforcement. The multiple layers of fibreglass combined with steel reinforcement ensures years of relentless strength and durability. This ensures a defect free product every time.

# A **BETTER** SWIM EXPERIENCE

CONVENTIONAL COUNTER FLOW SYSTEM

TURBINE SWIM SYSTEM WITH LEVITATOR JETS

Whichever model you choose, you will not be disappointed with the British Swim Spa range offering unrivalled aquatic luxury. Pro Plus and Turbine models come standard with swim exercise equipment including resistance arm bands, a swim tether and row bars so you can get the most out of your workout. All swim spa models have a height of over 1.5m, perfect for taller bathers and offering enough space for an authentic swimming experience.

## PRO

Pro models boast 4 powerful swim jets that can be controlled to suit your swim capability. Benefit from the cool down area with tiered seating doubling as steps into the spa for easy access.

## PRO PLUS

Pro Plus models offer 4 powerful swim jets, as well as levitator jets in the walls of the swim lane, helping to keep the swimmer afloat when swimming for a true swimming experience. There are 3 massage areas including two stand up zones, offering a full body massage for unrivalled hydrotherapy. Each of the 6 massage pumps operate 6 available streams for optimum power and performance. The tiered steps and seating is a standard feature, with a range of massage jets for an invigorating sports massage after an intense work out. This model also has a 'power button' injecting air into the swim jets for even more oomph.

## TURBINE

Our Turbine double counter current system provides the most powerful swim available; without the surface water turbulence associated with many other swim spas on the market. This dynamic system creates a symmetrical counter current for an unrivalled swimming experience, with up to 8 different speed settings. It leaves nothing to be desired - swim, train and exercise all muscle groups at a distance of 4m plus. This model comes complete with levitator jets in the walls of the swim lane to help keep the swimmer afloat, tiered seating doubling up as steps into the spa featuring the sports zone™ massage area, as well as two stand up zones. The Turbine system is also available with the optional SmartSwim Watch, meaning you can have full control of your swimming experience at the touch of a button, perfect when training for an uninterrupted swim session.

**NB - The Turbine adds an extra 81cm onto the swim spa.**

<b>SWIM JETS:</b>	4 or Turbine System
<b>JETS:</b>	Up To 38

\*Touchscreen control panel and exercise equipment only available on the Pro Plus and Turbine models.

## ADD A HOT TUB

Our DT (Dual Temperature) hot tub range enables you to add a hot tub to your swim spa to create a dual temperature exercise & hydrotherapy experience. Enjoy an intense work out to get the blood pumping, and then relax and unwind in the hot tub end with an invigorating massage. As there are two bodies of water this means you can control the temperature of both the swim spa, and the hot tub end.

The hot tub offers a maximum water temperature of 40 degrees Celsius/104 Degrees Fahrenheit, so whilst the swim spa remains a cooler and more comfortable temperature for exercise (usually around 30 degrees Celsius/86 degrees Fahrenheit), the hot tub is always ready and waiting for a luxurious soak.

The independent Balboa control panels and high powered pumps, mean that you can enjoy additional massage power without compromising the intensity of the exercise experience in the swim lane.

Our DT hot tub range cater to all, with barrier free seating for those who enjoy socialising, head to toe hydrotherapy offered in the lounge seats, as well as multi-level seating accommodating all shapes and sizes. The array of jet positions and massage zones in the curvilinear seating cover every muscle in your body, providing ultimate therapy.

If the BHT1000 or BHT2000 swim spa is the ideal size and specification for your exercise needs; The DT hot tub range can quite literally, and seamlessly, be merged into either of these swim spas, creating the perfect dual temperature hot tub and exercise pool.

## BHT2130

### SPECIFICATION

<b>DIMENSIONS:</b>	713 x 225 x 152CM (Complete Unit)
