# CABINS

*Perfect for use as summer houses, sheds and garden offices (or simply for some privacy).*

*Constructed from slow-growing Nordic timber, the grain of the wood is dense and close - so the timber provides insulation for all of the winter months and is robust enough to offer protection against the elements.*

## **ABOUT NORDIC SPRUCE**

Due to the long and cold winters the trees are growing slowly, which makes the timber especially thick and durable. And the aroma - there is nothing to compare to the wonderful aroma of fresh timber.

# AWNINGS

*Our Gibus awnings are famous for being reliable, technologically advanced and design worldwide. The forms and colours accompany cutting-edge technologies, in order to guarantee excellent and long-lasting functioning for maximum comfort.*

## MED OPEN FLY AWNING

Med Open Fly is a sophisticated solution and elegant outdoor awning to get you outdoors all year round..

The cover is made with an anti-UV blockout PVC cloth and the arched cloth permits lateral water drainage. Movement is transmitted on lateral guides and can be operated manually or by a motorized high-resistance timing belt. Available in various colour frames and fabric shades the Venetian design of the Med Fly is a super-stylish accessory to any garden or patio.

## MED VARIA AWNING

The bioclimatic pergola incorporates awnings and glass walls for protection against any sort of weather and to ensure privacy.

Motorised slats protect your paraphernalia from unpleasant weather and adjust the light intensity during the evening.

When night comes the fitted LED lights create a magical setting and the heating accessories will guarantee that you will stay warm and cosy.

## VELENDIA LIBRE AWNING

Gibus steadfast materials and technologies guarantee great performance over time and extreme resistance to all atmospheric agents. The Laminated Sail fabric offers efficacious protection from the sun, humidity and rain.

The aesthetically beautiful awning can have up to four stainless steel masts, inclined and is anchored to the ground by means of circular feet. The nautical solutions that inspire the Velenda offers sails that open up to 10 meters and can resist winds up to 40 km/h, with motors that can close the largest sails in less than 40 seconds.
